

ASSIGNMENT-3
NAME- SAGAR SHARMA
STUDENT-ID A00180642
INSTRUCTOR- REENA VERMA

- Difficulties I faced making this Book publication assignment:

So, Like any other assignment I faced many problems doing this assignment like adding image in the frame, sometimes it was not properly align or sometimes the pixels were distorted.

Second problem was what to include in the book,like there were tons of content to add so it was very difficult to decide what to exclude.

Lastly, Exporting as PDF and EPUB files, as I was trying to export the files with ctrl+E ,only one page was exporting everytime then I noticed I have arrange them in sequence and drag them down in the panel. Once I did that it was a piece of cake.

- Content in my Book:

I have included images, use the gradient tool to highlight the text and also used the shadow tool to highlight the key points. I also used the text wrapping tool. It contains the information related to finance and ways to design website for finance what to include,what are the key points that one should keep in mind. Typography was very helpful I didn't had to readjust the size of the text in every page.
